

Sept 20, 2005

To: My House Design/Build Team Ltd.

Kari and I wanted to add on to our house due to a growing family and a love of where we live.

Initially, we had no idea of how to start this huge process. We ran into Graeme Huguet at a Renovation Home-Show Exhibit and were impressed by his ideas and work. We live in Clayburn Village, Abbotsford, which is a heritage area where there were many hoops that we had to jump through. We worked together for months going over plans and getting approval, including the process of presenting to the Heritage Council and Board of Variance. Graeme was an excellent listener and took what we wanted for our design and made changes that we requested while giving great ideas.

When it came time to start building, we were very impressed by our crew on the house. They worked hard, knew what they were doing and took the time to explain what was happening. We are a close-knit community and all of our neighbours were impressed by Bruno and Norm's workmanship. The feature that everyone notices the most (and is our favourite) is the 18' skylight over our kitchen. Piers did a fantastic job with the glass and glue-lam beam supports. We liked the look so much that we left the beams and supports exposed. Any visitor to the house always mentions the skylights.

Anyone looking for a renovation / addition should consider "My House Design Build Team". We are pleased with the result and look forward to raising our family for many years to come in our new home.

Sincerely,

Brian & Keri [REDACTED]
Clayburn Village, Abbotsford, B.C.
