To Graeme Huguet:

After being told by several other builders that it was not possible to have a kitchen addition because of how our rooflines intersected, a friend suggested we contact Graeme Huguet as he had designed their renovations and addition. We were particularly impressed with Graeme's vision of the final product while it was still in the initial planning stage and we were thankful that we followed through on his well thought out suggestions.

We were very pleased with the final result of our *My House* kitchen renovations. This consisted of completely gutting the existing kitchen and doubling its size with the use of a glass extension onto our pool deck, and installing new cabinets and countertops, and tile floors. Additionally, Graeme coordinated the resurfacing of our pool, perimeter drainage and concrete sundeck. Piers Wylie, our project foreman, was greatly appreciated for his attention to detail, precision workmanship and friendly manner.

We would certainly recommend *My house team* along with Graeme Huguet and Piers Wylie to anyone considering kitchen renovations or additions whatever the scope or complexity of the project.
